

These are the various Amateur Radio Echolink Nets I check into, or run during the week, as of September 1, 2010. Net Times are U.S. Central Time; please turn Conference Mode OFF before connecting to a node. Websites are noted, if applicable. Last minute issues may prevent checking into, or running any of the nets noted, and nets may be cancelled at the last minute. Area RF Nets are NOT included, unless they're on Echolink...in which case, the local frequency is listed, with the Echolink node ID. For the PCL Packet Net, a telnet connection is made to the N0KFQ BBS in Branson, Missouri...please email me for details on the PCL Packet Net, or send packet mail to AE5WX@N0KFQ.#SWMO.MO.USA.NA – I use the OutPost Packet program for messages.

I'm Webmaster for the Cabot Nightflyers Net, Net Control for the Cabot Area Simplex Group Net, Net Control for the Railroads Net, Net Control for the ARES Club Net, and one of the Net Controls for the Skywarn Hurricane Prep Net. Other nets are checkin, with traffic, if required. If my node (AE5WX, node 51800) is not up...or if it's "BUSY", please try again later. You can leave a message with EchoAnswer, and find my contact info on the QRZ website (search for AE5WX), or go to <http://www.wx1der.com/fbk.htm> Daryl Stout, AE5WX, Little Rock, Arkansas
